Version notes

- **v0.1** This is the initial public release of the dataset, that was used as an input for the Brown and Garlick (2023) LSQ paper. It includes the data, a spreadsheet with a crosswalk to observe sessions (included in Table 4 of this overview) and a readme file with a description of the variables. The four states not included in the LSQ paper (MA, ME, NE, SC) should be considered a beta release, as they were not subject to a second validation that was conducted on the remaining 46 states.

Purpose and overview:

- This dataset attempts to put the universe of state legislation available on the internet in the US into a common space, to measure each step that each bill took on its way to passage (or where it failed)
- It proposes a coding scheme to standardize the bicameral legislative process across these states.
- It covers all states made available by the OpenStates legacy CSV bulk download service in late 2019. This includes all 50 states from the 2009-10 biennium to 2017-2018, with limited geographic coverage before and after.
- It includes 1,016,984 pieces of legislation.
- As part of the **American Joint Observation of State Legislative Politics** project: “AJO”, these data will connect to other datasets that observe the policy type of legislation and the size of state interest group communities by policy.

Acknowledgements:

- I thank the OpenStates project, which originally included a number of passionate researchers and data scientists for collecting and releasing this data. OpenStates has since been acquired by the Plural company, and I thank Jesse Mortensen and the team there for keeping this important work alive.
- This dataset also includes variables coded by Adam Brown (BYU) for our *LSQ* paper.
- I thank Peter Bucchianeri (Center for Effective Lawmaking at Vanderbilt University) for the “companion bills” for Tennessee legislation.
- Finally, I appreciate the hard work of reading individual bill histories that my students at The College of New Jersey did in the fateful Spring of 2020: Emma Becker, Juan Carlos Belmonte, Anthony Cortazzo, Catriona Leary, Anthony Saginario, Kiana Stockwell, and James Wright.

Data input: It is based on a collection of legislative histories, called “bill actions” collected and partially standardized by the OpenStates project (see Figure 1). These were downloaded in bulk in late 2019. More recent sessions are currently available from OpenStates’s “Bulk Downloads” offering. See:

<https://openstates.org/data/session-csv/> or see an archived version of their legacy data offering: <https://web.archive.org/web/20190227170558/https://docs.openstates.org/en/latest/data/legacy-csv.html>.

In Figure 1, I provide an example of a single bill that has been coded. The underlying action-by-action codes have yet to be released, in this release I aggregate the data from each of these histories into a single observation. However, the dummies allow for the observation of every step along the way that was reported. With very rare

exceptions, the OpenStates data is taken at face value, and the OpenStates project relies on state legislative websites to accurately convey bill histories. I have validated many bill histories against state legislative websites, but these observations have not been validated against the print legislative journals or the actual events in a state legislature.

Table 2: Full list of variables

name	Description	Notes
ajo_id	This is a unique identifier	St-year2-session#-prefix-billnum-suffix
state	State abbreviation	String.
fips	State numeric code	Numeric
year2	Biennium ¹	First year of odd-even sessions. Second year of even-odd sessions (NJ, LA, MS, VA)
Year1	Year of activity	If a single year of activity is specified
sess_str	Session (string variable)	See Table 3 below. ²
special	Is this a special session?	
sessrank	Which number session is it within a biennium	

¹ The Brown Garlick 2023 LSQ paper uses the opposite version, by taking the second year of odd-even sessions.

² These variables are necessary to create the unique identifier.

bill_id	Bill id	From Open States (e.g. HB 1002)
bill_prefix		
statute	Is this a statutory bill?	From Brown Garlick 2023 ³
insamp	In the Brown Garlick 2023 sample	46 states ⁴
date_start	Day of first action in legislative history	From OpenStates “bill actions”
date_end	Day of last action in legislative history	
lpcode	Further legislative progression	10-90, see Table 1 above.
dum_10_1rd	Was the bill observed to include this action?	See Table 1 above for full list of dummies and corresponding actions.
...	continued	
dum_90_law	Was bill enacted into law.	
tn_primary_bill_id	Primary bill id for Tennessee bills	Thanks to Peter Bucchianeri and the Center for Effective Lawmaking at Vanderbilt University for collecting these.
tn_comp_id	Companion bill id for Tennessee bills

³ Pieces of legislation coded (1) are considered statutory bills, this is primarily “House Bills” or “Assembly Bills” or “Senate Bills.” Pieces of legislation coded (0) include resolutions, joint resolutions, memorials and other non-standard forms of legislation. Bills coded (2) are from the states where it is not possible to observe statutory bills from their prefix: MA, ME, SC. Bills coded (3) are from Nebraska (see footnote 4).

⁴ In addition to three states mentioned above, NE is excluded from the sample because it is unicameral.
